

*Pegasus Blades*TM

Introducing... the rotor blades you have all been waiting for... Draganfly *Pegasus Blades*TM for the Draganfly I, II, III, IV, and V Ti helicopters.

After years of development and new custom tooling we are proud to introduce the latest improvement to our line of helicopters.

*Pegasus Blades*TM have many new features that make them superior to our previous blades and all other copycat blades.

- New blade material for better strength and uniform product quality.
- Tapered blade thickness for just the right balance of strength, flexibility, minimum weight, and maximum aerodynamic efficiency.
- Thicker hub and blade root prevent boom strikes during aggressive maneuvering.

- True airfoil cross section for better aerodynamic efficiency.

- Larger blade diameter for increased lift.
- Tougher blade material makes *Pegasus Blades™* nearly indestructible!

➤ Buy your *Pegasus Blades™* today, and start getting even more out of your Draganfly helicopter!
